Jan/Andy - any comments on this message to Kelly?

Kelly - On August 7, 2014 EPA received a request to modify the slag pit sump post closure plan. The changes to the plan are very limited and are necessary in order to implement the CERCLA interim ROD. EPA intends to approve this request in the next couple of days but I would like to know if you have any concerns with FMC's proposed changes. Please either give me a call or email if you have concerns so we can address any issues. Thanks in advance for your assistance.
